I received this message from Mary-Jo Eger-Calvin on our Facebook account
Unfortunately this is what customers have come to expect from this company who spills sewage into lake Wylie repeatedly with no one charging them with breaking the law. Everyone who was sworn into office swore they would uphold the laws of the State of South Carolina and the United States. We don't understand why this company continuously gets to write new corrective action plans while they continue to break the laws. Can we please get an answer? Please have someone send a call to Tega Cay about the boil water advisory for Diamond Head that was issued January 11, 2014.

Can anyone help us on Diamond Head Circle find out what is going on with our boil water advisory. It has been over a week now.

Taking daily living into consideration this is getting costly. How about let's get the City to provide us the bottled water. I'd rather just have to go to city Hall or police station to pick up water. Going to the store is getting costly. Boiling is taking electricity.

Bathing in sewage isn't my style! Please help. I've called utilities Inc. no help. Just say need to get results back from lab! It's been over a week. Come on!
